

Worksheet #5: “Using GenAI to Create Custom Mind Maps and Concept Webs” Part 3~ S2E10

Overview

This worksheet will help you use AI tools to create a mind map or concept web. Mind maps and concept webs visually organize information, making it easier to understand complex topics and remember key details. Follow the steps below to create your own mind map from a main idea or assignment.

Part 3: Expanding and Defining Subtopics

1. Add Details for Each Subtopic

- For each subtopic, add a few key details, definitions, or examples. These should further explain or clarify each branch of your mind map.
- **Example:**
 - Subtopic 1: Definition, key points, examples
 - Subtopic 2: Definition, key points, examples

2. Organize Subtopics and Sub-branches

- Arrange sub-branches logically, grouping related information together. This helps reinforce connections between ideas and improves organization.

3. Reflection Questions

- How does organizing information in branches help you remember it?
- Are there any areas where you need to add more details or clarification.
